LG Hausys Interior Film BENIF sample book usage tips

Tip

N

:

These are new colors for 2019 & 2020. Non-flameproof products of the new colors will launch in 2021.

()

:

No. () refers to the non-flameproof color code.

+

:

Please check the pattern of the finished product of 1,220 x 2,000mm for the corresponding color from the pattern book.

!

:

Please make sure to observe the installation instructions at the back of the sample book for the relevant color

INDEX

* Color name change : HS001 → ES130, HS002 → ES158, NC014 → NS002, NC015 → NS003
* All colors are applicable for vessels (Except GS/GM, LE, PL, WV)

HEALTHIER, MORE PLEASANT, AND SAFER FROM FIRE

ECO-Friendly & Fire Safety

ECO-Friendly

LG Hausys Interior Film BENIF was developed with components satisfying the environment-friendly standards for various raw materials and adhesives, and transformed into a real eco-friendly product which meets the standards of public offices, schools, daycare centers as well as health-friendly homebuilding by achieving eco labels by types.

Eco Label

Indoor Air Quality

Eco Label

※ Some colors do not have an environment mark and environmental certificates are different for each product series, so please confirm the product name on the certificate and the environment mark on the packing box.

Volatile Organic Compounds	Commercial: Below 0.20 mg/m ³ .h Residential: Below 0.10 mg/m ³ .h
toluene	Below 0.080 mg/m ³ .h
formaldehyde	Below 0.015 mg/m ³ .h
lead, cadmium, mercury, hexavalent chrome	Below 1,000 mg/kg
lead	Below 600 mg/kg

Special Act on the Safety Management of Children's Product

Total phthalate plasticizer content
(FITI Testing & Research Institute)

Below 0.1%
(DEHP, DBP, BBP, DINP, DIDP, DNOP)

Antibacterial Performance (NW only)

Staphylococcus aureus and E.coli
exposure test result
(FITI Testing & Research Institute)

In case of bacterial count under 0.63 after 24
hours, antibacterial activity is 99.9%
(JIS Z 2801: 2010, film contact method)

Fire Safety

LG Hausys Interior Film BENIF is the product which was produced under the close quality control of LG Hausys and passed the strict flame proof testing of Korea Fire Institute. Also, the achievement of vessel material certification of Korean Register of Shipping by carrying out a performance test of vessel apparatus of KOMERI (Korea Marine Equipment Research Institute) proves its safety to be applicable for domestic and overseas vessels. (except GS, GM, LE, PL, and WV colors)

Korea Fire
Institute

Korean Register
of Shipping

Flame-resistant certification	carbonization area under 30㎠	carbonization length under 20㎢	remaining flame time under 3sec	Afterglow time under 5sec	Smoke Density under 200
-------------------------------	------------------------------	--------------------------------	---------------------------------	---------------------------	-------------------------

Classification standards

* Dm : the average value of maximum smoke density / CFE : critical heat flux at extinguishment / Qsb : average continued heat of combustion / Qt : total heat release / Qp : maximum heat release rate				
Item	partition wall, wall and ceiling materials	floor materials	deck materials	plastic pipe
Dm	≤200	≤500	≤400	≤400

◆ Commercial Interior ◆

LG Hausys Interior Film BENIF creates trendy space for various commercial spaces.

INTERIOR PROPOSALS

COMMERCIAL

Showroom

LG Hausys Interior Film can be easily applied to stores in any shape. Create a space highlighting products with warm wood film which is completely attached to soft curved surface.

1. RS124

2. RS56

3. NW105

Cafe

Select unique patterns and colors for trendy and characterful space including a cafe. Combination of somber brown-toned metal of a bar table and rough texture of walls offers more modern and luxury ambience.

1. EL177

2. RS127

3. RP45

Hotel

Interior Film products with reliable flame proof function are essential particularly for accommodations including hotels. The balance of film which looks like coated in dark blue paint and metal texture creates fashionable lifestyle hotel space.

1. EL178

2. RP06

3. CW622

Lobby

Apply classy wood patterns and natural stone products to the large area. It presents the grandeur and naturalness to the space.

1. BM003

2. BM004

3. BW003

◆ Residential Interior ◆

Based on the customer big data analysis of interior design for residential space, four most preferred styles and matching products are suggested. Create stylish space with LG Hausys trendy Interior Films and various materials.

Interior Film / Premium Wood
NW104

Interior Marble / Hi-Macs Granite
Urban Concrete G554

Flooring / House
Oceanus Cool Gray HTO0052-A3

Wallcovering / Bestie
Modern Boutique/ Gray White 82461-1

Windows and doors / Super Save5
Pure White WAP97-G9

Vintage / Kitchen

Decorate like a cafe with vintage wood film.

According to the analysis of LG Hausys big data, the hottest trend recently is a vintage style like cafes. The vintage style has a wide range of variations, for example, sometimes to be modern or retro, so creates unique space. Along with the comeback of red and dark wood trend, decorate cafes and other spaces easily with newly designed vintage film.

INTERIOR PROPOSALS

Open-type white

Minimal / Living Room

Create minimalist space with solid film.

A storage space problem, the nuisance of small-and-medium sized apartment, can be solved by constructing a customized storage closet with various ideas. A simple storage closet, which even looks like a wall thanks to solid Interior Film finishing, is the best choice to express the minimal lifestyle.

Soft Modern / Bedroom

Decorate your powder room with colors.

A healing space you want to have one at home. Create a hotel style powder room with LG Hausys Interior Film provided in a variety of colors as an interior color. The harmony of a room with bold colors and patterns inside a mono-toned chic space makes space in modern style with a softer touch.

Planteria / Living Room

Coordinate nature-like films with plants.

For space to live with colorful pet plants, create minimalist space as if you are drawing freshness on the clean and blank canvas. A matte and neat concrete texture creates enough sense of space to embody nature. It can be applied to any space with high workability, so, the best choice for planterior.

Antibacterial test report

Things to be aware of during Interior Film application

1. Before applying

- It is required to examine the areas in advance where problems may occur during installation by checking the type and condition of the adhered materials (MDF, etc.) on which the film is applied.
- In case of MDF, the adhesive strength and flame-proof performance differ based on density, so it is required to use MDF with uniform density.
- The painted surface should be cleaned with alcohol to remove contaminants, and checked for damage by solvent.
- Uneven areas should be polished with sand paper after the putty treatment and residues should be removed with a brush.
- In case of metal plates, the contaminants on the surface should be removed by using alcohol or lacquer thinner. Then uneven areas from welding should be polished with sand paper after the putty treatment and residues should be removed with a brush.
- It is necessary to carry out preliminary inspection work on the abnormal condition (pattern name, appearance condition, etc.) of the product selected by the customer.
- Installation should be carried out after the wooden construction and before painting and wallpaper work.

2. Prior task for Surface

- The section (cut area) of the adhered material (MDF, etc.) where the film will be applied must be polished sufficiently with sand paper.
- In particular, in case of wood materials (MDF, PB, etc.), as the smoothness of the bent and joint part is important, if the surface condition is found to be rough from the preliminary inspection, it must be polished by sandpaper or do putty treatment before installation.

3. Primer Treatment

- For the primer treatment, the cut surface of wood materials (MDF, PB, etc.) among adhered materials has a high primer absorption rate, so that the primer should be applied 2 or 3 times. Multiple applications should be carried out in sequence, after the previously applied primer has completely dried.

4. How to apply

- Please make sure that the cut surface of the film is not visible as much as possible for installation.
- Film installation should be done in a way that the adhered material is not visible as much as possible.
- Since it is likely there would be a color difference between product lots, it is necessary to classify product lots for installation.
- The site temperature should be maintained at 15 - 25°C from 72 hours before installation to 48 hours after installation. If the product is left outside in the winter time, it may cause deterioration of adhesion due to temperature drop.

5. Things to be aware of when applying specific products

SW, EL, LE, PL, WV	- These products have no film layers on the surface but surface treatment only, so please be careful rubbing and bending corners with wool felt or cotton gloves not to damage the printed layer. - Due to the surface treatment layer, the product may slip for overlapping installation. Therefore, it is required to apply the solution of water primer PM-04 and dry it sufficiently before installation.
US, UM, UP	- Outdoor products should be installed by observing a separate specification standard.
HIGH GLOSS	- In order to properly produce the luster effect of the film surface, the installation should be done in a clean environment. - If the installation is being made while foreign matters (dust, dirt, etc.) remain on the adhered materials (MDF, etc.) and the adhesive surface of the film, it may cause scratch or embossing on the film surface. - Due to the high hardness of the product, it is necessary to do finishing work perfectly by applying more force in order to prevent the edges from lifting and produce clean visual effect.
NATURE CRAFT	- It is required to do butt joint installation. There is a risk of peeling of the overlapped area due to embossing and surface treatment layer for the overlapping installation. - The product is made of special multi-layer structure, so if the surface is heated during installation, it may cause layer separation or surface wrinkles and cannot be applied to curved surface. - It is necessary to cut and install considering connection between patterns. It is not able to connect patterns properly if you cut the product according to the print scale on the release paper. - There is no film layer on the surface, so please be careful when rubbing the corners with wool felt cotton gloves, etc. not to damage the printed layer.

6. Others to note

- Film installation must observe the installation guidelines of the specifications.
- In regard to installation method and adhered materials (MDF, etc.), please contact LG Hausys or retail dealers to check the workability of installation in case of applying the product to the different adhered materials to the specifications.
- In case of application on acrylic materials, it may cause air bubbles so please contact and confirm with LG Hausys or retail dealers first before installation.
- For film installation, it is required to use LG Hausys water primer PM-04.
